

LAPIS Public Storyboard Plan

This public version intentionally removes exact generation prompts, detailed styling instructions, and source asset references. It preserves the assignment-level production record while reducing copy risk.

1. Project Summary

Brand	LAPIS
Product	Premium eau de parfum
Format	Vertical short-form brand advertisement, 9:16
Goal	Build brand awareness through a restrained premium fragrance mood
Public scope	README and public storyboard PDF only. Video and source media are excluded from GitHub.

2. Public Visual Direction

- The main palette uses midnight blue, sapphire blue, warm gold, and dark reflective surfaces.
- Character, wardrobe, and location references are described only at a high level in this public file.
- Exact prompts and source asset names are withheld to make direct scene recreation harder.
- Video files and original image assets are not included in the GitHub submission scope.

3. Scene Storyboard

Scene	Purpose	Public Visual Summary	Production Check
1	Product introduction	A product-led hero shot built around blue and gold contrast. Exact prompt withheld.	Image generation, motion generation, edit timing checked.
2	Brand muse	A restrained character moment showing quiet confidence. Specific wardrobe and cultural motif terms are removed from this public version.	Mood consistency and identity fit checked.
3	Scent diffusion	Light, particles, and close framing suggest the moment the fragrance spreads through the space.	Sensory transition and cut rhythm checked.
4	Presence shift	A dark interior movement scene shows the atmosphere changing after the fragrance is worn.	Before-and-after flow checked.
5	Brand recall	A final product and brand-name shot anchors memory of LAPIS.	Logo, product visibility, and final timing checked.

4. Tool Use Record

- ChatGPT: concept planning, scene intent, and key visual direction.
- Google Flow: image-based motion clips and scene movement.
- OpenAI TTS: Korean voiceover generation.
- CapCut: cut editing, audio levels, captions, and final export.

5. Prompt Iteration - Public Summary

The first character direction was too generic for a premium fragrance campaign. The revised direction clarified age range, restrained luxury mood, color palette, quiet confidence, and no celebrity likeness. Exact wording and detailed styling tokens are not included in the public file.

6. Public Copy Protection Adjustments

- Removed exact generation prompts.
- Removed or generalized detailed wardrobe and cultural motif references.
- Removed source media filenames and direct scene asset names.
- Kept final video outside the public GitHub file set.
- Preserved only the production process and verification details needed for assignment review.

This PDF was generated as a public replacement for the GitHub submission. It does not modify the local assignment folder.
